

FOR LOBBIES/WAITING ROOMS

CL400

The CL400 offers true HEPA filtration for a 1,400 sq ft space, making it a perfect solution for waiting rooms, open office areas or in the exam room with patients.

The unit draws from 360-degrees, offers true medical grade HEPA filtration and circulates the air back into the room.

Unit offers quiet operate with multiple speed settings and easy portability with casters.

FOR OPERATORIES

FX-FCD-HEPA

This unit can be positioned on the opposite side of the chair from the dentist to draw the air away from the patient's breathing zone, filtering the air with a TRUE Medical-grade HEPA and circulating it back into the room.

The unit features four-stage filtration:

1. Washable Pre-Filter
2. Deep-Pleated Moisture Barrier Filter
3. HEPA H13 Filter (99.95% Efficient at 0.3 μ)
4. 7 lb. Carbon Filter
5. Germicidal UV Light

The HEPA and Carbon filters combined capture contaminants such as bacteria, viruses, VOCs, disinfectant odors, and mercury vapour.

The hood on this unit reaches 6' 6" at this angle and the arm height can be easily adjusted to reach the proper height.

The hood is clear so as not to obstruct the dentists' view of the patient and has casters for easy portability and weighs roughly 40lbs.

Unit is built for quiet operation with a remote control, digital display and filter replacement reminders for low/easy maintenance.
